SOLUTION BRIEF

Protera + NetApp Cloud Solutions

Enterprise-grade performance at scale

Protera

NetApp

High-end workloads demand high-end storage.

Protera partners with NetApp to deliver enterprise-grade storage performance for the most demanding workloads running in AWS, Azure, and Google Cloud.

We work together to architect landscapes that meet today's intensive processing demands, provide built-in resiliency, and are fully integrated with your cloud strategy.

Microsoft Azure aws Google Cloud

With advanced certifications across AWS, Azure, and Google Cloud, Protera leverages NetApp for storage-intensive workloads like SAP and large-scale databases, delivering maximum performance and industry-leading data protection.

Founded in 1998, Protera is a global leader in Cloud Migrations and Enterprise Managed Services. We empower IT & business decision makers to drive transformation by delivering solutions that accelerate the impact of technology, unlock AI capabilities, and ensure that critical IT stacks don't just perform, they exceed expectations.

100%

Success Rate for Cloud Migrations

Client Spotlight

Medline

Medline was running 3,100+ SAP and non-SAP workloads in an aging datacenter and needed a modern cloud platform to provide the security and scalability needed to support future growth and handle increased workloads.

Protera and NetApp partnered to architect & successfully migrate Medline's 3.100 servers to Azure, using a combination of NetApp, Microsoft and SAP technologies to optimize landing zones, server builds, and system replication.

18 Mo
Migration, with wave-based strategy

99.99%
Uptime with real-time failover & log shipping

96%
Improvement for top 55 SAP transactions
