

Managed infrastructure and applications so you can take advantage of cloud-native innovation

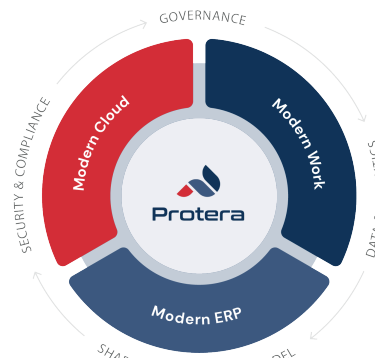

You want a global partner who is nimble, available, proactive, and offers full visibility into your system, workloads, and IT operations. A trusted team who guides you from discovery to migration to innovation with the deepest of technical cloud and ERP expertise.

Migrate and Modernize with Protera and AWS

As an Advanced tier AWS APN partner, Protera's comprehensive services enable the business to optimize cost, reduce TCO and modernize legacy applications and data, while reducing operational burden and remaining secure.

Next Generation Modern Management

- With automation backed by expertise, Protera delivers next generation management of your entire enterprise IT landscape on AWS, with modern work engagements to run better, work smarter, and innovate faster to support business goals.
- As the first to migrate and manage SAP on AWS, Protera is a leader in securing and running enterprise workloads on the cloud.

Next Generation Cloud and ERP Management

Modern Cloud

Drive the greatest value from the cloud with extended cloud adoption and managed services that drive down cost, improve security, and enable continuous innovation across the business

Modern ERP

Whether elevating ECC, or transforming to S/4HANA or RISE with SAP, our proactive end-to-end managed services ensure your mission critical workloads are secure, available, and optimized.

Modern Work

Extend the capabilities of cloud across the business with agile, flexible, and fully governed expansion solutions to elevate employee experience.

Trusted for over 25 years

Protera has been protecting our client's data and assets for over 20 years. As a globally certified SAP partner, SOC I and SOC II certified, Advanced tier APN AWS partner, Protera has technical qualifications that no other service provider can match.
